.Net developer

Linkedin: [linkedin.com](https://www.linkedin.com/in/vkasterov/)

GitHub: <https://github.com/Kasterov>

Summary	.Net developer with a year of work experience, who knows how to work with agile methodology and who has already been involved in many iterations. I consider it my greatest achievement to have been involved in the release of a project for a public organization "Historical platform" called Streetcode. I prefer back-end logic development, although I have worked with front-end web applications as well. In the future, I would like to become more familiar with application deployment.
Experience	
Position	Junior .Net Full-stack developer
Period	16.12.2022 - present
Project	https://github.com/ita-social-projects/StreetCode/wiki
Company	Softserve, Public Organization "Historical Platform"
Responsibilities	Requirements analysis and clarification; Writing documentation; Estimation tasks; Code development and bug fixing; Development build and deployment scripts; Scrum meetings;
Achievements	Fixing existing bugs; creating an admin panel to display all posts with sorting, filtering and pagination; creating and configuring blob storage for storing files added to the site; development of automatic generated SQL scripts from existing migrations; Logging on the backend; scrum mastering; writing and fixing unit tests; adding soft deleting for records;
Technologies	C#, ASP.NET, Swagger, EF Core, AutoMapper, JSON Web Tokens, MS SQL, Moq, xUnit, MediatR, HTML, SASS, JavaScript, TypeScript, React TS, Axios, MS SQL, Azure, NUKE build

	Telegram bot "Medalkin"
Description	When you add it to the chat, you will be able to issue "medals" to all users of the chat. When some event occurs and one of the users wants to jokingly capture it in the chat memory, then when a special command is written, a smiley face will be saved in the database for a specific user, a description of the event for which this smiley/medal was issued and date.
Project	https://github.com/Kasterov/ApiMedalkin
Technologies	ASP.NET core, Swagger, Lambda serverless apigateway, DynamoDB, API Telegram
	Restful API "ATM"
Description	Simulated atm behavior in which you can initialize, withdraw money, deposit money and send it to another user. The architecture is as clean as possible.
Project	https://github.com/Kasterov/AtmService
Technologies	C#, ASP.NET, Swagger, Entity Framework Core, Sqlite

Education	Dnipro University of Technology, Faculty of Information Technology: 2020-2024 Exchange student, University of Tartu, Computer Science: 2022-2023
Additional education and skills	ESL English Courses (course with native English speaker), ITVDN course of C#, .Net. Book "C# 7 programming language Andrew Troelsen", Epam IT marathon: AWS, DynamoDb, S3 bucket, Angular, ASP.NET MVC and minimal API. Experience with: Oracle Enterprise Manager, PostgreSQL, Postman
Hobbies	I am keen on video montage, play table tennis, chess and computer games.
